

Art.-No. 78520

Marten Shock Profi

Innovative triple defence system

The Marten Shock Profi is water resistant, splash proof and as professional as the name suggests. The device combines three defence technologies in order to help you protect your car against unwanted marten visits. The emitted sound is irritating for martens and most of them will try to keep their distance. Should a marten insist on entering the engine compartment, the high-voltage modules and the dazzling bright flashes of light will tell it that this is no place to stay. The integrated electronics ensure a stable ultrasonic frequency output at regular intervals for consistent protection. The device is connected directly to the car battery. The high-voltage modules are distributed throughout the engine compartment in order to prevent marten bites and fouling under your bonnet.

Additional information

- **Dimensions:** 12 x 7.5 x 3.5 cm (W x H x D)
- **Packaging dimensions:** 18 x 21.5 x 5.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product video, product images, scenery images**
- **Packaging unit:** 10 units per package

Patented

Corrosion-resistant high-voltage modules

Integrated vibration sensor:

Device switches on when the motor is switched off

Car battery protection:

Device switches off if the voltage of the car battery drops below 11.4 V

IP65

Specifications

- **Frequency:** 12 - 24 kHz +/- 10 %, approx. 85 dB
- **High voltage:** 4 contact modules
400 V DC +/- 50 V DC
- **LED:** Flash of light
- **Protection class:** IP65
- **Current:** 30 mA
- **Current consumption:** 0.42 W
- **Voltage:** 12 V DC, connection to the car battery
- **With on/off switch**
