Marten Shock Plus

Innovative triple defence system

The Gardigo Marten Shock Plus is designed to permanently protect your car from invading martens. The device combines three defensive technologies and helps protecting your car against unwanted marten visits. The innovative system emits varying tones, which are most uncomfortable for martens, and has high-voltage plates and bright flashes, should the marten decide to creep under your bonnet. The integrated technology ensures a constant and stable output of alternating frequencies. The device is connected directly to the car battery. The high-voltage plates are distributed throughout the engine compartment in order to prevent damage to hoses and wires as well as soiled engine compartments. The repellent uses a vibration sensor, which will switch the device on when the vehicle is parked.

Additional information

- **Dimensions:** 12 x 7.5 x 3.5 cm (W x H x D)
- **Packaging dimensions:** 18 x 21.5 x 5.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product video, product images, scenery images**
- **Packaging unit:** 10 units per package

Corrosion-resistant high voltage pads

Integrated vibration sensor:

Device switches on when the motor is switched off

Car battery protection:

Device switches off if the voltage of the car battery drops below 11.4 V

IP65

Specifications

- **Frequency:** 12 - 24 kHz +/- 10 %, approx. 85 dB
- **4 high-voltage plates:** 400 V DC +/- 50 V DC
- **LED:** Flash of light
- **Protection class:** IP65
- **Current:** 30 mA
- **Current consumption:** 0.42 W
- **Voltage:** 12 V DC, connection to the car battery
- **With on/off switch**
