

Art.-No. 78585

Marten Repellent Flex

Flexible use: Battery operated or hooked up to the car battery

All options open: Marten Repellent Flex can be connected to the car battery, but can also be easily powered by standard AA batteries and used anywhere martens cause you problems. This is especially convenient for electric cars: They do have a 12V battery like conventional vehicles, but many manufacturers recommend not connecting marten protection to it. With the option to use the device with AA batteries our Marten Repellent Flex can be used in any automobile!

The device emits flashlights and high-frequency tones that extend into the ultrasonic range. The frequency modulation technology prevents the martens from becoming accustomed to the device. The internal vibration sensor detects when the vehicle is moving and activates it automatically when parked. Optionally, the sponge included with our marten repellent spray (Art.-No. 25120) can be attached to the front with the included brackets. This way, you can use three repellent methods with just one device!

Additional information:

- **Dimensions:** 13 x 7 x 3.9 cm (W x H x D)
- **Packaging dimensions:** 8.8 x 13.5 x 6.2 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL, PT
- **Product images, scenery images**
- **Packaging unit:** 40 units per package

For connection with the car battery

OR

Battery operated for mobile use

Specifications

- **Range:** ~ 60 m² in enclosed spaces
- **Frequency:** 12 – 24 kHz
- **Interval:** ~ 5 seconds ON, ~ 25 seconds OFF
- **Battery:** 4x AA (Mignon), 1.5 V each (not included)
- **Status-LED**
- **LED strobe light**
- **Battery compartment on the device front for easy changig**
