Marten Repellent

For Cars, Attics & Garages

The marten repellent is a battery-operated device designed to keep martens away from vehicles, attics, and other sensitive areas. The compact device runs on four AA batteries, making it independent of an external power source and highly versatile—ideal for installation in a car's engine compartment, where martens often cause damage, as well as for use in attics, garages, or gardens.

The device emits high-frequency sounds at approximately 12 kHz, which are barely perceptible to humans but unpleasant for martens. To prevent habituation, the sounds are activated and deactivated in intervals of about 60 seconds. This intermittent operation ensures the device remains effective for long-term use.

Additional information:

- **Dimensions:** 6.5 x 13 x 3.4 cm (W x H x D)
- **Packaging dimensions:** 7.5 x 15 x 5.5 cm (W x H x D)
- **Manuals included:** DE, GB, CZ, SK, PL, RO, HR, BG
- **Product images, scenery images**
- **Packaging unit:** 6 units per package

A convenient on/off switch allows for easy deactivation, for example, when people or pets spend extended periods near the device, such as in an inhabited attic. This adds extra convenience while also conserving battery life.

The marten repellent is designed to be robust and weather-resistant, making it suitable for both indoor and outdoor use. It provides an easy and humane way to keep martens at bay, ensuring your vehicle or attic remains protected and undisturbed.

Specifications

- **Range:** ~ 40 m² in enclosed spaces
- **Frequency:** 12 kHz +/- 10 %
- **Interval:** ~ 60 seconds ON, ~ 60 seconds OFF
- **Battery:** 4x AA (Mignon), 1.5 V each (not included)
- **Status-LED**
