- Hole-Dimensions: approx. 3 cm
- Manuals included: DE, GB, FR, ES, IT, NL
- Product images, scenery images
- Packaging unit: 6 units per package

Its entrance hole is ideally sized for great titmice, tree sparrows and nuthatches. A great eye catcher for the garden, but at the same time it is useful. Birds can hardly find any natural cavities in trees and cliffs anymore. The Gardigo Bird House Caravan give them a place to nest, overwinter and raise their young. Watch the fledglings on their first flight!

Its elaborate design makes the Bird House Caravan suitable as a decorative object in your living quarters as well. Just look at the numerous little details!

Use:

- 1. The ideal place to hang or set the bird house is sunny, but sheltered from wind and rain.
- 2. Let the entrance hole face south.
- 3. Great titmice, tree sparrows and nuthatches are resident birds that spend the winter in our climes. Leave the birdhouse hanging during the cold season to give them shelter.
