Bat Nesting Box

Shelter for bats

Do you see bats fluttering around the street lights in the evenings? Do something good and offer them a shelter! The Bat Nesting House is a natural accommodation for bats. Many bats in our climes like to nest in barns and attics. The ever improving insulation of houses and roofs makes it increasingly difficult for bats to find a suitable place to nest. If you do have bats in or near the house, you can help them find a suitable nesting site by hanging up this Bat Nesting Box.

Hang the Gardigo Bat Nesting Box at a height of 3 – 6 metres on an exterior wall or on a tree. A half-shaded location, e.g. under the eaves, is ideal. Proximity to known nesting places is advanta-

geous, as the animals like to settle in close proximity to nesting places of the previous year and to their conspecifics. This is why installing several nesting boxes in one place can be a good idea.

Most types of bats feed on insects such as flies and mosquitoes. Thus the nocturnal animals can be of great use for us as a biological way of pest control.

Additional information

- **Dimensions:** 40 x 32 x 11 cm (W x H x D)
- **Packaging dimensions:** 33 x 13 x 41.5 cm (W x H x D)
- **Manuals included:** DE, GB, FR, ES, IT, NL
- **Product images, scenery images**
- **Packaging unit:** 4 units per package
