Bird Nesting Box Swedish House

Garden ornament

With its red paint and white details, this nest box looks like a real little Swedish house. Give birds shelter in winter and nesting opportunities in spring and summer! The entrance hole has a diameter of 30 mm. This feature is ideal for small birds, especially for many tit species.

The roof has a flap, and the house is easily cleaned when winter sets in. Birds will accept a clean, parasite-free nesting place in

the coming year. A jute cord is attached to the roof to hang up the nesting house in a tree. Numerous small details make the bird nesting house Sweden House an attractive eye-catcher in the garden.

Use:

1. Hang the bird house in sunny spot, sheltered from wind and rain.
2. The front of the house should ideally be facing south.
3. Please leave the house hanging in winter. Birds are nesting and overwintering in it.
