## Insect-Hotel DIY

Easy do-it-yourself kit

Crafting is fun – and our environment can benefit. This nesting aid for insects is very easy to assemble with the illustrated instructions. All you need is a screwdriver or cordless screwdriver (neither is included).

Various solitary bee species can nest in the bamboo tubes. Solitary bees play an important role in the ecosystem as pollinators of flowers. Pine cones and wood shavings provide shelter for ladybugs, earwigs and other garden critters.

### Additional information

- **Dimensions:** approx. 25 x 25 x 13 cm (W x H x D)
- **Species:** spruce
- **Manuals included:** DE
- **Product video, product images, scenery images**
